Re: Commitment to Rule M-10

## Gentlemen:

I hereby commit the applicant to comply with Rule M-10, "Reclamation Standards" in its entirety, as adopted by the Board of Oil, Gas, and Mining on March 22n 1978.

The applicant will achieve the reclamation standards for the following categories as outlined from Rule M-10 on all areas of the land affected by this mine, unless a variance is granted in writing by the Division.

Rule	Category of Commitment
M-10(1)	Land Use
M-10(2)	Public Safety & Welfare
M-10(3)	Impoundments
M-10(4)	Slopes
M-10(5)	Highwalls
M-10(6)	Toxic Materials
M-10(7)	Roads and Pads
M-10(8)	Drainages
M-10(9)	Structures & Equipment
M-10(10)	Shafts and Portals
M-10(11)	Sediment Control
M-10(12)	Revegetation CHIEF ENGL.
M-10(13)	Dams AUG 1 8 1978
M-10(14)	Soils
	NOTED

in ruch av Page 2 of 2

I believe a variance is justified on a site-specific basis for the following subsections of Rule M-10 for reclamation on this mine and have enclosed as an attachment to this letter a narrative statement setting forth a description of the extent of the variance request and factual reasons for said variance request.

Rule Category of Variance Request (Narrative Attached)
M-10(8) Waste dumps placed in Natural Channels (see note 1
STATE OF Pennsylvania
COUNTY OF Allegheny
I,
and attest that all of the representations contained in the foregoing application
are true to the best of my knowledge; that I am authorized to complete and file
this application on behalf of the Applicant and this application has been executed
as required by law.
Signed: Senkenn Vice President
Taken, subscribed and sworn to before me the undersigned authority
n my said county, this 14th day of hugust 3 19 %.
Notary Public: Sandra M. Walters, Notary Public: Sandra M. Walters  fy Commission Expires: PITSBURGH, ALLEGHENY COUNTY
MY COMMISSION EXPIRES  DECEMBER 22, 1980  NOTE 1: Some of our dumps cross small dry channels. The only time these channels
ever run water is during a heavy storm. The dumps always have the coarser material on the bottom due to segregation on the angle of repose as it is dumped. Run-off water will go right under them. It would be impossible to remove these dumps.
